

Basic Legionella Management

CPD, Gatehouse & IIRSM Approved - 3 CPD points

Companies and building owners have a legal duty to manage Legionella.

These legal duties and current legislation are set out by the Health and Safety at Work Act along with the HSE's updated code of practice known as L8. Lack of training and awareness of Legionella has shown to be factors in many outbreaks of legionella. Having adequate training and carrying out appropriate checks can ensure water system safety.

Our interactive training course is aimed at all employers and staff to assist them in identifying the danger that Legionella poses and identify ways to assess sources of risk from Legionella on the premises.

This course is aimed at building and facilities managers, and maintenance professionals that have nominated responsibilities for water systems.

Module Number	Module Name	Pass % required
1	What is Legionella?	70
2	Risk Areas	70
3	Legislation	70
4	Risk Management	70
5	Water System Monitoring	70
6	Cooling System Awareness	70

Duration: 75 minutes (Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions.)
