

# Working in Confined Spaces

IIRSM & CPD Approved - 2 CPD points

This course provides a firm understanding of the control measures that need to be followed when working in, or near a confined space as detailed in a safe working procedure.

The course covers the legislation associated with working in confined spaces, defines confined space, the potential hazards, safe operating and emergency procedures and rescue.

Please note this is an awareness course designed for people who need to be aware of the hazards and risks of confined space working. If your duties include daily or frequent activity in a confined space further practical training is advised.

## Learning Objectives

By the end of this course, you will be able to:

- Recognise the key legislation and its application to working in a confined space
- Understand the dangers of working in a confined space and identify the hazards involved
- Define and state the safety procedures that can be used to reduce the risks associated
- Apply and evaluate the communication methods needed and the emergency procedures that need to be followed
- Remember the importance of the paperwork involved in following legal obligations

| Module Number | Module Name                              | Pass % required |
|---------------|------------------------------------------|-----------------|
| 1             | The Law                                  | 70              |
| 2             | Confined Space and the Dangers?          | 70              |
